

EMEME VICTOR SYLVANUS

FRONTEND WEB DEVELOPER

+234 9030330349 | ememevictor08@gmail.com | <https://github.com/Slyyv17> | <https://victor-dev-gamma.vercel.app/> | <https://www.linkedin.com/in/victor-ememe-77597722a/>

PROFILE

A highly motivated and passionate frontend web developer with a strong foundation in HTML, CSS, and JavaScript. Currently pursuing a B.Sc. in Software Engineering at Babcock University. Skilled in building responsive and user-friendly web applications. Eager to contribute to dynamic teams and projects while expanding skills in web development.

SKILLS

- **Languages:** HTML, CSS, JavaScript
 - **Frontend Frameworks:** React, Tailwind CSS
 - **Tools:** Git, Visual Studio Code, Vite
 - **Responsive Design:** Mobile-first design, CSS Grid, Flexbox
 - **Version Control:** GitHub
 - **Other Skills:** SEO basics, Cross-browser compatibility, Graphics Design, Software Architecture (System Designer)
-

EDUCATION

Bachelor Degree – Software Engineering Major
Babcock University | 2026

- **Relevant Coursework:** Web Development, Computer Programming, Software Architecture, Java Programming
-

TECHNICAL PROJECTS

Personal Portfolio Website

Project Overview:

A portfolio website of mine designed to showcase all my projects based on my skills.

Link: <https://victor-dev-gamma.vercel.app/>

- Designed and developed a fully responsive personal portfolio website using HTML, CSS, and JavaScript.
- Incorporated modern design principles and optimized for mobile and tablet views.
- Utilized Flexbox and CSS Grid for a structured layout.

Bahmas Hotel Website

Link to Project: <https://slyyv17.github.io/Bahmas-Hotel/>

Project Overview

The Bahmas Hotel website is a fully responsive hotel booking platform designed and developed to provide users with seamless navigation and access to the hotel's services. It showcases the hotel's rooms, amenities, and offers an easy-to-use booking interface.

- Designed and developed a fully responsive hotel booking website using HTML, CSS, and JavaScript.
- Implemented modern UI/UX principles to ensure seamless navigation and accessibility across all devices, including mobile and tablets.
- Showcased various hotel room types with dynamic content, incorporating high-quality images, descriptions, and pricing for user selection.
- Built an interactive booking form, allowing users to select check-in/check-out dates and room preferences.
- Utilized Flexbox and CSS Grid for structured layouts, ensuring an intuitive, user-friendly design.
- Integrated interactive image sliders for showcasing hotel amenities and services.
- Implemented a contact form to enable easy communication between potential customers and the hotel.
- Deployed the website via GitHub Pages for live accessibility and efficient performance.

Technologies Used

- **HTML5:** Structure and content of the website.
- **CSS3:** For styling, including responsive layouts and hover effects.
- **JavaScript:** Used for interactive features like sliders and form validation.
- **GitHub Pages:** Hosting platform for deploying the live website.

Weather Application (Cloud)

Link to project: <https://react-weather-app-psi-ebon.vercel.app/>

Project Overview

The React Weather App is a fully responsive weather app that uses geolocation to display the user's weather condition at any place in the world, and also allows the user to search for valid places around the world.

FEATURES OF THIS PROJECT:

State Management: Manages search input, city name, weather data, user location, and toggle state for switching between user location and searched city weather.

- Geolocation: Fetches user's current location using the browser's Geolocation API.
- Weather Fetching: Retrieves weather data for either the user's location or a searched city via the OpenWeatherMap API.
- Toggle Functionality: Switches between showing weather for the user's location and the searched city.
- Search Bar: Allows users to search for a city's weather.
- Tailwind CSS: For responsive and minimal styling.
- Error Handling: Displays error messages if weather data or location cannot be retrieved.
- Icons: Uses react-icons for visual elements like the search and map pin icons.

Technologies and Tools used:

- React Js
- Tailwind CSS
- Vite
- Open Weather API

Video Editor's Portfolio

Link to project: <https://slyyv17.github.io/Wachukwu-Victor-portfolio/>

- Designed and developed a fully responsive personal portfolio website using HTML, CSS, and JavaScript.
- Showcased various personal projects and skills with a focus on frontend development and graphic design.
- Utilized Flexbox and CSS Grid for structured layouts, ensuring an intuitive, user-friendly design.
- Integrated interactive sections for smoother user navigation and engagement, including hover effects and smooth scrolling.
- Implemented a contact form to facilitate easy communication with potential employers and collaborators.
- Deployed the website via GitHub Pages for live accessibility and efficient performance.

Weather App

Link to Project: <https://weather-app-seven-henna-23.vercel.app/>

- Developed a weather application using HTML, CSS, and JavaScript that pulls real-time weather data from an external API (OpenWeatherMap).
- Implemented search functionality and displayed data dynamically on the user interface.
- Optimized the app for various screen sizes using media queries.

URL SHORTENER

Link to Project: <https://shortly-url-six.vercel.app/>

- Designed and developed a fully responsive URL shortening web application using React.js and CSS.
- Implemented functionality for users to shorten long URLs, providing them with a simplified, shareable link.
- Integrated an API to handle URL shortening, allowing real-time interaction and quick link generation.
- Utilized modern UI/UX principles, ensuring a clean and user-friendly interface across different devices.
- Incorporated Flexbox for structured layout, optimizing the design for mobile and desktop users.
- Deployed the application on Vercel, ensuring fast and efficient performance with continuous integration and deployment.

EXPERIENCE

Frontend Web Development Intern

Shadows Dev | Babcock University | 07/2024 – Present

- Assisted in developing responsive web pages using React, Tailwind CSS and Vite.
- Collaborated with other developers to build and test user interface components.
- Fixed bugs, optimized performance, and improved site responsiveness across browsers.

Frontend Web Developer

Babcock University Computer Club Developers Team | On-site | 08/2024 – Present

- Working on the BUCC website with other experienced developers
- Built a custom website using React and Tailwind CSS and Vite ensuring cross-browser compatibility.
- Provided ongoing maintenance, including updates and bug fixes.

Project:

- Collaborated with UI/UX Designer and a Frontend Web Developer to build a Departmental Website using React Js and Tailwind CSS

Full Stack Web Developer Intern

Stalwart Crest | Babcock University | 09/2024 – Present

TECHNICAL PROJECTS:

- **Challenge App CRUD API**
 - Developed a comprehensive CRUD API utilizing Spring Boot
 - Implemented robust API endpoints for seamless data manipulation
 - GitHub Repository: <https://github.com/Slyyv17/ChallengeApp-API>
- **TODO API**
 - Designed and implemented a TODO API using Spring Boot
 - Enabled efficient task management through intuitive API endpoints
 - GitHub Repository: https://github.com/Slyyv17/TODO_CRUD_API
- **E-commerce API**
 - Created a scalable E-commerce API for product and order management
 - Integrated features for seamless product catalog management and order processing
 - GitHub Repository: <https://github.com/Slyyv17/Shopcart-api>

Frontend Web Developer

Google Developer Group (Core Team) | Babcock University | 10/2024

- Collaborating with other frontend web developers to build seamless and responsive websites and turn them to reality.

CERTIFICATIONS

- **INFORMATION AND COMMUNICATION TECHNOLOGY** – Cisco | 2022

ACTIVITIES & CLUBS

- **Coding Club Member** – Babcock University
- **Hackathon Participant** – NexTech Hack | 2024
- **Volunteer Web Developer** – Shadows Dev | 2024
- **Volunteer Frontend Developer** – BUCC Developers Team
- **100 Days of Code** – Self-study

PORTFOLIO

<https://victor-dev-gamma.vercel.app/>

- Explore projects ranging from responsive web designs to JavaScript-based web applications.
